

Going to the USA - A Practical Guide to Expansion into the US Market

Registration is now open for our seminar on Thursday 5 September at 12pm.

As a key player in the world economy the US is a leading market for companies considering expanding into international territories.

For those businesses that are looking to grow their existing footprint, make new acquisitions or set up new operations in the US it is crucial that businesses plan appropriately so no unexpected delays, taxes or fines are experienced during the process.

To help businesses understand the key elements to consider when looking at expanding into the American market, the BDO Leeds office will be hosting a seminar focusing on some of the main issues presented by experts from both the US and the UK.
